

Software Developers – C/C++

Description

Experts town AB is a small consultancy company that provides services to big brands in Automotive, Locomotive, Telecom and other such industries.

We are looking for C/C++ developers to strengthen the engineering team. We can offer technical challenges as well as career development in our engineering organization.

You must have a strong technical interest and knowledge within embedded software development. You should be able to work alone and together with others as most of our development is done together with other teams.

Qualifications

We expect that you have

- Good knowledge within C/C++ and Python
- Experience of Embedded systems, Android and Linux development environments
- Knowledge about version handling tools like Git.
- Experience of working in projects and knowledge about agile development methods.
- Relevant academic background such as MSc/BSc in embedded or IT or computer or software or electrical/electronics engineering.
- Minimum 3-5 years software development experience preferably in Automotive industry
- Fluent in English
- Have permanent residence of EU or Sweden or citizen of EU or Sweden.
- Willing to relocate if needed
- Car driving license is plus

We are continuously hiring and looking for talent. Do not wait and Apply now!
